FOR RELEASE FRIDAY, MAY 19

Montana State University is one of three schools in the United States selected to conduct in-service institutes in radiation biology in 1961-62, under the co-sponsorship of the National Science Foundation and the Atomic Energy Commission, MSU officials announced. The University has been awarded a \$3,530 NSF grant to operate the institute, which will also receive AEC support.

The institute for high-school biology teachers will be directed by Dr. James W. Gebhart of the education faculty. Classes will meet on campus on Saturdays throughout the school year, starting Sept. 16.

Participants will receive stipends for transportation and textbooks, Dr. Gebhart said. They may earn nine hours of graduate credit for the course, he added.

Requests for information and application blanks should be addressed to Dr. Gebhart at the University. The deadline for applications is June 15, he said.
